

**RAPID & COST EFFECTIVE SOLUTIONS
TAILORED TO SUIT YOUR REQUIREMENTS**

THE EXPERTISE OF ALL OR ONE

» Early Stage Product Design & Engineering

- Product Development & Engineering (NPI)
- System Design
- Thermal Modeling
- Boards, Modules & Enclosures
- Circuit & Routing
- BIOS, OS and Drivers Support, Firmware Customization
- Design for Manufacturability (DFMA)
- Test Development and Design for Test
- Component Risk Mitigation & Obsolescence
- Value Analysis / Value Engineering
- Program Management / Product Life Cycle

» Contract Manufacturing Services (EMS)

- Full Turn-Key and Labor Only Manufacturing
- Subsystem Assembly & Integration
- Printed Circuit Board Assembly (PCBA)
- Lean Manufacturing Principles
- Cable & Wire Harness Assembly
- Sheet Metal & Precision Machining
- Powder Coating & Lamination
- Testing & Screening, Failure Analysis
- Local / Regional / Asian Supply Chain Management
- Low to High Production - Volume Scalability

» Aftermarket Solutions & End of Life Support (EOL)

- Warranty, Repair & Logistics Support
- Direct Fulfillment
- End-of-Life Material Management

FROM PROTOTYPE TO PRODUCTION

DELIVERING REAL BENEFITS TO YOUR BOTTOM LINE

PARPRO specializes in contract manufacturing and the design and manufacture of processor based embedded solutions to serve OEMs in a variety of vertical markets.

PARPRO is a full service design & manufacturing company with an emphasis on ODM solutions. We offer a comprehensive engineering-rich hardware solution with low-to-high volume manufacturing and integration/test capabilities, and pride ourselves on delivering simple to complex solutions making our manufacturing offerings competitive at virtually any volume and with any sourcing

strategy. We serve customers in a variety of vertical markets providing time savings and cost optimization by minimizing margin stacks throughout the value chain.

From concept through production, delivering real benefits to your bottom line

>> DESIGN & ENGINEERING

Leverage our strengths in purpose-built board and system-level design and production. The breadth of our experience, our knowledge across many software and technology platforms, processor architectures, form factors, power envelopes, and market spaces, makes us ideally positioned to provide innovative and cost effective solutions.

This allows us to identify the best combination of technology for each unique project without compromising, design, cost, schedule or feature set.

>> MANUFACTURING EXPERTISE

PARPRO brings product designs to life and can serve as your one stop manufacturing services solution. PARPRO has multiple plant locations and global partnerships creating knowledge sharing, economies of scale, and flexible production scheduling synergies. We specialize in leading-edge PCB assembly and electronics manufacturing services along with precision sheet metal fabrication, machining and box build assembly and integration. We own and operate in-house state of the art SMT, DIP, assembly and testing facilities and can handle your manufacturing requirements either onshore, offshore or nearshore.

>> CERTIFICATIONS/STANDARDS

- ▶ ISO 9001:2015
- ▶ ISO 13485:2016
- ▶ ISO 14001
- ▶ AS9100D
- ▶ ITAR Registered
- ▶ NADCAP – Electronics, Welding
- ▶ UL Certified
- ▶ IPC Standards
- ▶ FAA Repair Station
- ▶ C-TPAT Compliance

>> WHY CHOOSE PARPRO?

GLOBAL ORGANIZATION

In business since 1991 with over 700 employees worldwide. Publicly listed on the Taiwan Stock Exchange since 2014 (4916:TT).

INDUSTRIES

Aerospace & Defense | Datacenter Gaming | Industrial | Medical | Telecom | Transportation | Embedded Solutions & Platforms

ODM SOLUTIONS

One company through design, development and production, providing a faster more flexible, high quality solution resulting in cost optimization and margin stack reduction.

DESIGN & ENGINEERING

Leading-edge purpose-built US based hardware and firmware development for NPI, application specific and standard products.

MANUFACTURING SERVICES

State-of-the-art manufacturing solutions (EMS), specializing in production at all volume levels – either onshore, offshore or nearshore.

GLOBAL SUPPLY CHAIN

Low cost country or regional supply chain with North America based engineering and global integration, production, distribution, and fulfillment.
